

SC2000

Riding high on cleaning efficiency

NILFISK

Intuitive dashboard with One-Touch button and built-in LCD display

Filling system with automatic shut-off once tank is full (optional)

Fully removable recovery-tank lid for easy cleaning

Compatible with the modular Nilfisk Lithium-ion Battery

- Fast-charging capability: Go from 0 to 90% capacity in just 2 hour
- Modular performance: Increase runtime by up to 3x to match your needs
- Optimal uptime: Easy service with redundant, highly reliable battery modules
- Superior lifespan: Up to 7 years and 1500+ charge-discharge cycles
- IoT connectivity: Battery Management System tracks and logs performance

Ride-on performance at a walk-behind price

An attractive choice for our partners in the retail, hospitality, healthcare, and educational fields, the Nilfisk SC2000 “micro” ride-on scrubber dryer reduces working effort significantly compared to a walk-behind machine.

With an operating speed of up to 6 km/h – a 50% increase over the average walk-behind’s speed – the SC2000 has a highly beneficial impact on both productivity and cleaning costs. It’s easy to manoeuvre, even in narrow spaces, and its Silent mode function enables low-noise daytime cleaning, even in sound-sensitive areas.

Efficiency is also maximised by the machine’s 2-key system: A single blue key controls basic operator settings, while a single yellow key allows superusers access to all settings, preventing accidental adjustments or misuse.

- **High productivity:** Operating speed of 6 km/h, 70L tanks, and up to 3.5 hours’ runtime
- **Effective coverage:** 53 cm brush deck with brush-speed and suction adjustable to floor characteristics and condition
- **SmartFlow™:** Detergent/water-dosing levels automatically adjust to operating speed
- **Powerful scrubbing:** Double-pressure function can be activated when needed
- **Energy-efficient:** Adjustable brush-motor speed depending on floor condition
- **User-friendly:** Automatic deck and squeegee raising with One-Touch button and clickable ON/OFF button for easy installation/removal of brush/pad holder
- **Easy handling:** Light squeegee with patented elastic-strap system for easy blade removal/change

Full-tilt recovery tank provides easy access to battery compartment and Ecoflex system

Optional USB port for device-charging

- Electric actuators for one-button lowering/raising of deck and squeegee
- 2-key system with separate setting controls for superusers and operators
- Automatic squeegee-lifting during reverse operation
- Protective, shock-absorbing bumpers on brush deck and squeegee
- Robust, chemical-resistant polyethylene tanks
- Easy access to operator seat from both sides; ergonomic working position and comfortable pedal placement
- Ecoflex provides flexible detergent settings or water-only cleaning. 60-second power burst increases water flow, detergent application, and scrub pressure
- Clickable ON/OFF button for easy installation and removal of brush/pad holder

Technical specifications

Description	Unit	SC2000 FPKG PH UK	SC2000 NIL LITHIUM-ION X BR
